

Imagine . . . A software that streamlines your allocation processes and measures the community impact of your funded programs.

Andar/360 is a cost-effective, fully integrated suite of products that addresses the strategic objectives of nonprofits, including fundraising, online donations, constituent relationship management, volunteer matching, I & R (2-1-1) management, community impact, and more.

Your organization expends considerable effort and resources in preparing for the allocation process. Requesting proposals; collecting and distributing agency applications; reviewing demographics, budgets, logic models, and performance indicators are all a part of each and every funding cycle.

Significant hours are spent entering and merging data to analyze and compare each funded program's effectiveness. In the end, your data ends up in multiple databases and spreadsheets throughout your organization.

You know there must be a better way to manage this process . . .

Introducing Andar/360's Allocations & Outcomes – Community Building Module

Features & Benefits:

- A single database of integrated information.
- Increases information sharing between departments within your organization.
- Easy online registration for agencies.
- Web based function application process – agencies enter their data once via the Web.
- Streamlines and speeds up the submission process and eliminates the need for re-keying of data.
- Tracks agency funding, program effectiveness, and progress in meeting program and community outcomes year after year.
- Online access for your volunteers to review applications, analyze data, and evaluate the effectiveness of funded programs.
