**Helix continues to enhance the product to meet the ever-expanding requirements of its customers, thus insuring that Andar/360 remains the system of choice for nonprofits.**

Helix has provided software solutions to nonprofits since 1991. Our current flagship offering, Andar/360, is a cost-effective, fully integrated suite of products that addresses the strategic objectives of nonprofits. It provides leading edge technology to manage information gathered from mission-critical activities of your organization, including fundraising, funds distribution, volunteer management, constituent relationships management, and community impact. Its “e-Community” modules harness the power of the Internet to interact with your constituents and partners. Information is accessed through a single, consistent, and intuitive user interface. Andar/360 is completely integrated and provides a holistic, 360-degree view of your organization.

*“The Andar database is used by our entire organization as the central repository for all our volunteer/donor/agency information. Andar provides us with “one stop shopping” allowing us to track, manage and report on all the information that is important to our organization. With it, we can effectively manage donor relationships, respond quickly to volunteers, and know exactly how our campaign is progressing at any point in time. It also lets us maintain information related to our Community Partners, and provides us with the analytical tools to strategize and focus our fundraising efforts.”*
